

Imaging pictures

ZA-UVSS-II

Fixed Under Vehicle Surveillance System

Product Features:

- Adopt digital line scan camera with extremely high image resolution and clarity.
- The bottom of the car is completely imaged without any omissions, and the image is clear, complete and without distortion. Objects with a diameter of no less than 2mm can be clearly observed.
- IP68 high protection level, pressure-proof and shock-proof, suitable for use in any climate environment.
- Inspection procedures can be compiled on-site to meet various on-site needs.
- Multi-channel scene image monitoring and recording functions.
- Extremely strong expansion capability, can easily realize linkage control of various systems (such as anti-collision system, barrier gate, etc.).
- Supports network control function of multiple devices. China science and technology safe world
- It has intelligent image judgment function.

Basic parameter indicators:

Scanning method: linear scan, ground sensing coil trigger
Maximum scan rate: 18kHz
Vertical resolution of vehicle bottom image: 2048 pixel CCD
Image resolution: >12000×7500
Detection speed: 1-80km/h
Scanner data cable: 100 meters (customizable length)
Field of view: 178 degrees
Lighting component: single sealed LED surface light source, life span: 50000h
Scanning direction: bidirectional
Load bearing: 50T
Waterproof level: IP68, suitable for all-weather work
Ambient temperature: -20 degrees - +60 degrees
Scanner weight: 105kg
Scanner size: L1100*W280*H234mm (including underground protection device)
Working voltage: DC24V
System power supply: AC110-240V/50-60Hz
